

You've never seen standard like this before.

Some rules were made to be broken. When we designed the John Deere 3036E Standard Compact Utility Tractor, we stretched the boundaries for what a standard tractor could be. We've added

high-end features like hydrostatic transmission, a powerful engine and an ergonomic operator station. All this at a surprisingly low price.

Key Features

- 37.1 horsepower engine
- Durable transmission and axles
- Hydrostatic transmission
- Easy to operate

Choice of tyres. Choose agricultural, industrial all-purpose or turf tyres to suit your needs.

Two-stage differential lock and brake. Gain traction and stability, even on rough terrain. When pushing down more, the brake will safely stop the tractor.

Ergonomic operator system. Levers and controls are within easy reach.

Hydrostatic transmission. Go a step beyond a gear transmission for ease of use.

Powerful engine. Speed through the working day with 36 horsepower.

Strong front axle. Tackle tough jobs without compromising safety – or your equipment.
